Personal Statement

Junior software developer with a strong focus on backend development using Java, Spring Boot, and PostgreSQL, with full-stack experience across React and Node.js applications. Built multiple API-driven systems including a Dockerized Spring Boot library management service and a MERN-based real-time chat application. Comfortable designing REST APIs, working with relational databases, and integrating frontend interfaces with backend services. Focused on writing clean, maintainable code and continuously improving engineering skills.

Technical Highlights

- Built a Dockerized Spring Boot REST API with JWT authentication and PostgreSQL persistence
- Developed a full-stack MERN chat application with authentication and real-time messaging
- Designed relational database schemas and implemented SQL queries including joins, triggers, and stored procedures
- Documented and tested API endpoints using Swagger / OpenAPI

Key Skills

- Programming: Java, JavaScript, TypeScript, SQL
- Backend Development: Spring Boot, Spring Framework, Node.js, REST API design, JWT authentication
- Frontend Development: React, HTML5, CSS3, Vite
- Databases: PostgreSQL, MongoDB
- Other: API integration, debugging, problem solving
- Languages: English (fluent), Afrikaans (fluent)

Education

- Java Developer Bootcamp — Jul 2025 – Jan 2026
Code College

- Web Developer Bootcamp — Jul 2024 – Jan 2025
Code College
- Matric (Full Qualifications) — 2019
Teneo Online School

Projects

[Library Management API](#) — Spring Boot, PostgreSQL, Docker, JWT, Swagger

- Developed a backend system supporting authentication, role-based access control, and full CRUD operations for authors, books, borrowers, and loans
- Implemented JWT authentication and authorization for secure API endpoints
- Containerized Spring Boot and PostgreSQL services using Docker Compose
- Documented and tested all endpoints using Swagger UI

[Chat Application](#) — MERN Stack (MongoDB, Express, React, Node.js)

- Built a real-time chat application with user authentication and persistent message storage
- Developed REST APIs with Express and integrated them with a React frontend
- Designed responsive UI components and managed client-side state

[Portfolio Website](#) — React, TypeScript, GitHub Pages

- Designed and deployed a personal portfolio showcasing projects, technical skills, and developer profile
- Built using React and TypeScript and deployed via GitHub Pages

Employment History

- **Software Development Trainee— Compuways (2024–Present)**
Hands-on development of full-stack applications, REST APIs, authentication systems, SQL databases, and Dockerized Spring Boot services, following clean code and industry best practices.
- **Range Officer & Sales Assistant — Waterfall Arms & Guthries Shooting Range (2022–2024)**
Customer service, compliance, equipment sales, data management, and teamwork.
- **Freelance Bagpipe Musician (2016 – Present)**
Performing at weddings, funerals, and formal events.
